

# Harvest Update!

Thanks to the donations of £190 for Cafod we have been able to buy more resources to enable our villagers to improve their lives.

We have bought two green houses.

The gift of a mini greenhouse will help our villagers get the most from their growing space and put fresh, nutritious food on their dinner tables every day.

We also bought some squiggly worms!

These worms make fantastic compost that boosts crops and helps to increase income for farmers. This means our villagers may be able to grow a little extra food to sell to buy things like medicine or books.

Our villagers have also got two new chickens!

along with training to help look after them, so our villagers can produce eggs to eat and sell.
