

Reception Home Learning 21.11.22

We are reading:

Michael Rosen • Helen Oxenbury

Vocabulary -
repetition, repeat, repeated phrases

Maths

In maths, we have been learning to subitise - this is when you are able to look at a group of objects and realise how many there are without counting. Playing dominos and games that use a dice are a great way to help your child master this skill.

We will be learning about time this week. As well as looking at the days of the week, we will also be learning the months of the year.

Maths Vocabulary

Vocabulary: First, next, later, then, before, after, every day, night, order, Names of days/months

More Reading to enjoy:

We will be enjoying books by the author Michael Rosen this week and next. Following on from the rhyming books we enjoyed last week, Michael Rosen has his own website with many links to his work. There are also a number of clips of Michael performing his own poetry. In promoting our love of reading and significant authors, we hope that you can find some time to enjoy a clip or two with your child.

Understanding the World

Linked to the Bear hunt, we will discuss maps and obstacles that we might see on a journey and the sounds that these might make. On your way to or home from school, look out for features in the local environment and discuss their importance.

Phonics

This week we will be revising all of the Phase 2 Phonics as well as our tricky words. Please keep practising your blending and segmenting using the parent information sheets provided and don't forget to cut up your flashcards and practise naming the sounds every day.

Also, here is a little clip to help the children practise recognising the Phase 2 tricky words
